## Summary

A bicycle handlebar extension to mount different accessories (e.g. light)

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [bicycle](#) [handlebar](#)

A bicycle handlebar extension to mount front light (or other handlebar-mounted accessory) when it's not possible to do so on the handlebar itself. Designed to fit 32mm or 22mm handlebars (parts are named accordingly).

Files named "arm\_" and "clamp\_" should be printed in 2 copies for symmetrical mounting.

You can change the Z scale of "tube" part if necessary.

Also, you'll need the following countersunk screws to assemble it:

- 4x M3x20 (to secure the clamps to the arms)
- 2x M5x30 (to secure the tube between the arms)

# Model files

32 mm
